

## *Coffee Filter Angel*

### **Materials (Included):**

3 coffee filters

2 cotton balls

2 pieces of 12" twine or ribbon

1 white pipe cleaner

1 gold pipe cleaner

Scissors (not provided)

Glue (not provided)

### **Instructions:**

1. Place two cotton balls in the center of one of the coffee filters.
2. Hold the coffee filter with your fingers, gathering the cotton balls in the center to create the angel's head.
3. Place a second coffee filter onto the open end, tucking the filter in a bit into the head area. This will produce the layered effect on the dress.
4. While holding the filters together, wrap one end of the pipe cleaner around the "neck" and twist to secure. Set angel aside.
5. Take the third coffee filter and fold it in half, then fold the filter accordion style length-wise (like a paper fan). Place the center of the fanned filter at the base of the neck. Wrap the pipe cleaner around the center and fan out the wings.
6. Use the excess pipe cleaner to create a halo for the angel.
7. Create a loop with the ribbon by looping it through the pipe cleaner in the back of the angel. Tie to create the hanger for the ornament (if this is too tough, then the ribbon can be glued on).
8. Use the last piece of ribbon to make a bow for the angel, if desired.
9. If you want to make a face, do not use marker since it will run and ruin the ornament. Paint would be needed to make a face.

## *Baby Jesus Ornament*

Peg Doll  
White fabric scrap  
Grass/Brown paper strips

### **Materials:**

18 in piece of twine  
2 Gold stars  
Thin wire

Ribbon (for hanging)  
Glue (not provided)

### **Instructions:**

1. Glue the tip of the wire between the two gold stars. Allow this to dry completely.
2. Roll the grass/brown paper into a ball in your hands like you would playdough. Make a nest for your peg doll to lay in.
3. Swaddle your peg doll in the white fabric scrap. Insert end of the wire down the back of the peg doll, so that the star sticks out above the head of the doll.
4. Place the baby in the nest. Use the twine to tie it in place and hold all pieces together. Twine can be wrapped around more than once.
5. Bend the wire so that it brings the star up over the baby's head.
6. Lay baby Jesus amongst the branches of your tree or other decorations.

## *Burlap Star and Heart Ornaments*

### **Materials (Included):**

2 Burlap squares  
1 heart pattern  
1 star pattern

embroidery thread and needle  
pillow stuffing  
2 pieces of 6" twine

Twinkle bell  
Glue  
Scissors (not provided)

### **Instructions:**

1. Use the heart and/or star pattern to cut two burlap squares in the same shape.
2. Place the two shapes on top of each other and stitch them together with the needle and embroidery thread. Make sure to leave an open space so that you can stuff it.
3. Stuff the shape with as much stuffing as you prefer. Now complete the stitching to close the shape.
4. Use the twine to create a loop for hanging your ornament. You may either stitch the loop in the ornament or glue it on.
5. Use the extra twine and string the bell on to the twine. Tie a bow with the twine. Glue or stitch the bow and bell decoration onto your burlap shape.

## *Mason Jar Wreaths*

### **Materials (Included):**

Mason jar lid with rim  
Fabric squares

10 in ribbon piece  
Gems, stars, sequins, etc...

### **Instructions:**

1. Use your glue to glue the fabric square onto the top of the lid insert. It helps to take your finger and smear the glue around the edge of the lid before laying the fabric on top!
2. Cut off the excess fabric (This does not need to be precise – rough edges will not be seen).
3. Decorate the fabric circle and rim of lid with the gems, stars, confetti, etc. as you desire.
4. Once all is dry, wrap a pipe cleaner around the outside rim and twist to secure. You can create a hook with the excess pipe cleaner or loop a ribbon under the pipe cleaner to make a hanger for the ornament.
